Stakeholders and Sustainability

Stakeholder engagement. What does it mean? Stakeholder engagement is talking and collaborating with individuals and groups who share a common interest. For [Vermont Insights](#), stakeholders are all those concerned with the well-being of Vermont families. Vermont Insights is most effective when those stakeholders talk and collaborate to make child, family and community data accessible and useful.

Vermont Insights Reveals New Community Data Profiles

Vermont Insights (VI) is developing Community Data Profiles, a tool to enable users to organize data by location, visual type (chart, table or map), and time, with accompanying text prepared by data and content experts.

A recent Community Data Profile was created using the prototype of this [new tool now available](#). This Community Data Profile is called the [Con Hogan Trend Line Collection](#).

Data & Evaluation Committee Chronicle

We are growing and changing!

We want to share with you the committee's revision of its roles and responsibilities. In addition to our ongoing role as data ambassadors and advisors, the committee now serves as a "honeycomb" for Result #5 in Vermont's [Early Childhood Action Plan](#). We are a collective of partners with expertise in ensuring that data and accountability drive progress in early childhood outcomes.

Open Data Movement in Rutland City - Early Childhood and Police

In early November, Kathleen Paterson and I met up with Rutland's BBF Regional Coordinator, Peg Bolgioni, and visited the Rutland City Police

Department to discuss [Project Vision](#) (a collaboration of interested citizens who are working to improve the community), and their [progressive open data movement](#) aimed at bringing [crime data](#) into the public eye.
